Python for Data Science Practical

Practical - II

Roll No. :S026	Name:Sakshi Patade
Class :SYIT	Batch :
Date of Assignment :22/07/26	Date/Time of Submission :22/07/26

Questions:

2a. Write a python code to create nested tuples.

Code:

```
name = ("Sakshi",26, ("Bsc.IT", "Sem 3"), 90)
print("Name :",name[0])
print("Roll_no :",name[1])
print("Department :",name[2][0])
print("Semester :",name[2][1])
print("Percentage :",name[-1])

print("Sakshi Patade S026")
```

Output:

```
Name : Sakshi
Roll_no : 26
Department : Bsc.IT
Semester : Sem 3
Percentage : 90
Sakshi Patade S026
```

2b. Write a python code to sort the nested tuple using sorted () function.

Code:

```
data = [(1,4),(3,2),(5,1)]
sorted_data = sorted(data, key = lambda x: x[1])
print (sorted_data)

print("Sakshi Patade S026")
```

Output:

```
[(5, 1), (3, 2), (1, 4)]
Sakshi Patade S026
```

2c. Write a python code to copy or clone list.

Code:

```
list1 = (1,2,3,4,5)
list2 = 0
list2 = list1

print("list2 = ",list2)

print("Sakshi Patade S026")
```

Output:

```
list2 = (1, 2, 3, 4, 5)
Sakshi Patade S026
```

2d. Write a python code to check immutability property of python tuples.

Code:

```
name = ("Sakshi",26,("Bsc.IT", "Sem 3"),90)
name[0]="Sejal"
print("Name :",name[0])
print("Roll_no :",name[1])
print("Department :",name[2][0])
print("Semester :",name[2][1])
print("Percentage :",name[-1])

print("Sakshi Patade S026")
```

Output:

```
Traceback (most recent call last):
  File "C:/Users/itlab/Desktop/SAKSHI_SYIT/tuple.py", line 2, in <
module>
    name[0]="Sejal"
TypeError: 'tuple' object does not support item assignment
```

Curiosity Questions:

Q1. Define a tuple. How is it different from a list? Give one example.

Q2. Write a Python program to create the following tuples:

- a) An empty tuple
- b) A tuple with integers only
- c) A tuple with mixed data types
- d) A nested tuple (tuple inside another tuple)

Q3. Write a program to access elements of a tuple using indexing and slicing.

Q4. Create a tuple and find the following:

- Length of the tuple
- Maximum and minimum value (if all are numbers)
- Count of a specific item

Q5. Write a program to convert a list into a tuple.

Q6. Write a program to sort a tuple of numbers in ascending order.

Q7. Write a program to show that tuples are immutable (cannot be changed).

Q8. Write a program to clone (copy) a list and print both original and copied lists.

Q9. Write the output of the following code:

```
t = (1, 2, 3, 4, 5)
```

```
print(t[1:4])
```

Q10. Create a tuple of student marks: (78, 85, 92, 88, 76). Write a program to:

- Find average marks
- Display marks above 80
